

Nail Manicure in a Jar

Print the toppers and punch out using a 1 ¾" or cut using your Silhouette Cameo (registration marks are included). Print on adhesive backed paper if you have it or apply adhesive to the back of each circle and attach it to the top of the jar.

Print the labels, front first. Then, depending on your printer, reverse the page and print the inside. Then cut on the light gray cut line or cut using your Silhouette Cameo (registration marks are included).

Fold the labels in half. Punch a small hole in the upper left corner, run a ribbon through it and attach to the jar.
